Israel's Moment:
by Jeffrey Herf

Israel's Moment is a major new account of how a Jewish state came to be forged in the shadow of World War Two and the Holocaust and the onset of the Cold War. Drawing on new research in government, public and private archives, Jeffrey Herf exposes the political realities that underpinned support for and opposition to Zionist aspirations in Palestine. In an unprecedented international account, he explores the role of the United States, the Arab States, the Palestine Arabs, the Zionists, and key European governments from Britain and France to the Soviet Union, Czechoslovakia, and Poland. His findings reveal a spectrum of support and opposition that stood in sharp contrast to the political coordinates that emerged during the Cold War, shedding new light on how and why the state of Israel was established in 1948 and challenging conventional associations of left and right, imperialism and anti-imperialism, and racism and anti-racism.

► **FRIDAY, MARCH 3**
Zero Fail: The Rise and Fall of the Secret Service
by Carol Leoning

The Secret Service was born in 1865, in the wake of the assassination of Abraham Lincoln, but its story begins in 1963, with the death of John F. Kennedy. Shocked into reform by its failure to protect the president on that fateful day in Dallas, this once-sleepy agency was radically transformed into an elite, highly trained unit that would redeem itself several times, most famously in 1981 by thwarting an assassination attempt against Ronald Reagan. But this reputation for courage and excellence would not last forever. By Barack Obama's presidency, the once-proud Secret Service was running on fumes and beset by mistakes and alarming lapses in judgment: break-ins at the White House, an armed gunman firing into the windows of the residence while confused agents stood by, and a massive prostitution scandal among agents in Cartagena, to name just a few. With Donald Trump's arrival, a series of promised reforms were cast aside, as a president disdainful of public service instead abused the Secret Service to rack up political and personal gains.

► **FRIDAY, APRIL 7**
Horse
by Geraldine Brooks

Kentucky, 1850. An enslaved groom named Jarret and a bay foal forge a bond of understanding that will carry the horse to record-setting victories across the South. When the nation erupts in civil war, an itinerant young artist who has made his name on paintings of the racehorse takes up arms for the Union. On a perilous night, he reunites with the stallion and his groom, very far from the glamor of any racetrack. New York City, 1954. Martha Jackson, a gallery owner celebrated for taking risks on edgy contemporary painters, becomes obsessed with a nineteenth-century equestrian oil painting of mysterious provenance. Washington, DC, 2019. Jess, a Smithsonian scientist from Australia, and Theo, a Nigerian-American art historian, find themselves unexpectedly connected through their shared interest in the horse—one studying the stallion's bones for clues to his power and endurance, the other uncovering the lost history of the unsung Black horsemen who were critical to his racing success. The story is based on the remarkable true story of the record-breaking thoroughbred Lexington.

► **FRIDAY, MAY 5**
The Forsaken
by Tim Tzoulidas

Of all the great movements of population to and from the United States, the least heralded is the migration, in the depths of the Depression of the 1930s, of thousands of men, women and children to Stalin's Russia. Where capitalism had failed them, Communism promised dignity for the working man, racial equality, and honest labor. What in fact awaited them, however, was the most monstrous betrayal. In a remarkable piece of historical investigation that spans seven decades of political change, The author follows these thousands from Pittsburgh and Detroit and Los Angeles, as their numbers dwindle on their epic and terrible journey. His account exposes the self-serving American diplomats who refused their countrymen sanctuary, it analyses international relations and economic causes but also finds space to retrieve individual acts of kindness and self-sacrifice.
